(g) M10 bolt x4

(h) M10 flat washer x4

(i) M10 spring washer x4

(j) M10 nut x4

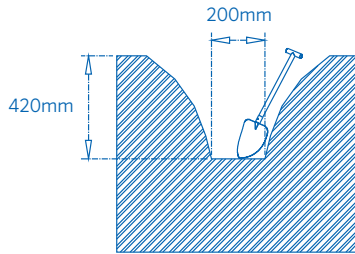

(k) Spanner

STEP 2

Choose a suitable location for your umbrella in-ground mount ensuring there is enough space above and around to freely move the umbrella, and the ground is soft enough for a hole to be dug . Decide whether to secure the mount with concrete, soil, or sand and gravel. You will need these materials, along with a shovel and spirit level (not provided).

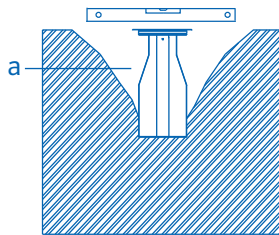

STEP 3

Dig a hole in your chosen spot approx. 200x200mm wide by 420mm deep.

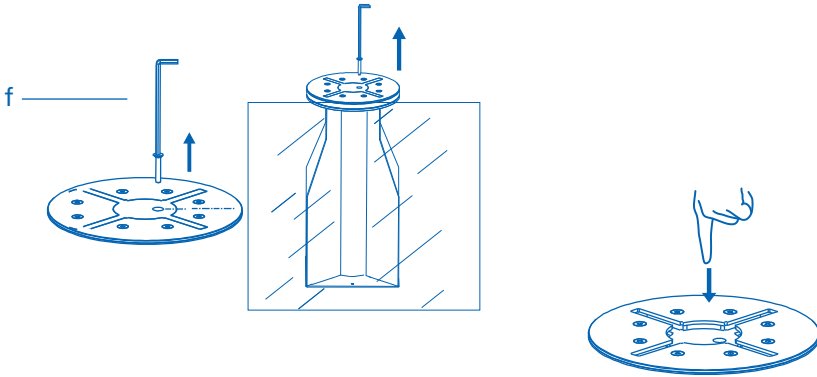

STEP 4

Place the mount (a) into the middle of the hole and fill around it with cement, sand or soil, ensuring top of mount is perfectly level with the ground surface. Adjust as needed using the spirit level to check.

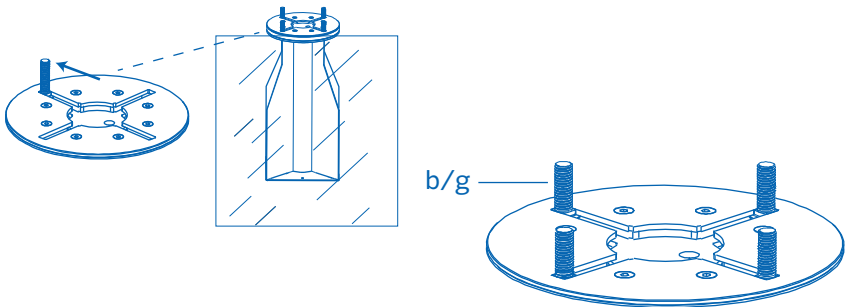

STEP 5

Once concrete has set or mount is fully secure, use the Allen key (f) to unscrew and remove the middle screw on the base plate and safely store it. Then push down on the centre section to lower the cross-shaped part.

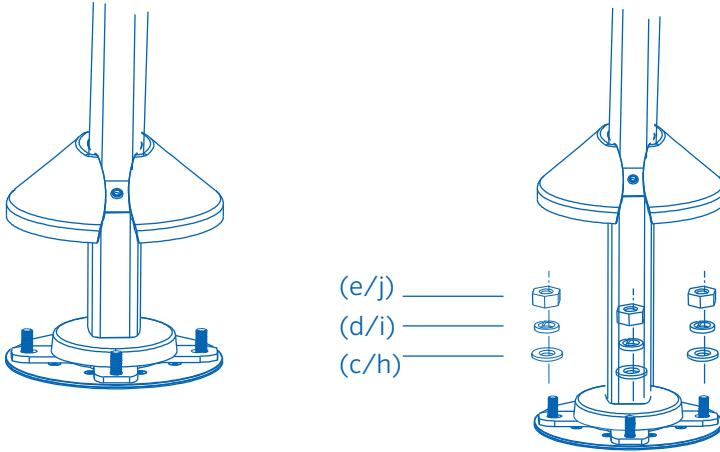

STEP 6

Determine whether the bottom of your umbrella best fits M8 or M10 bolts. You will only need to use one set of the included fixings, either M8 or M10. Slide one of the appropriate bolts (b or g) into each of the four 'arms' on the top base plate with the bolt threads facing up.

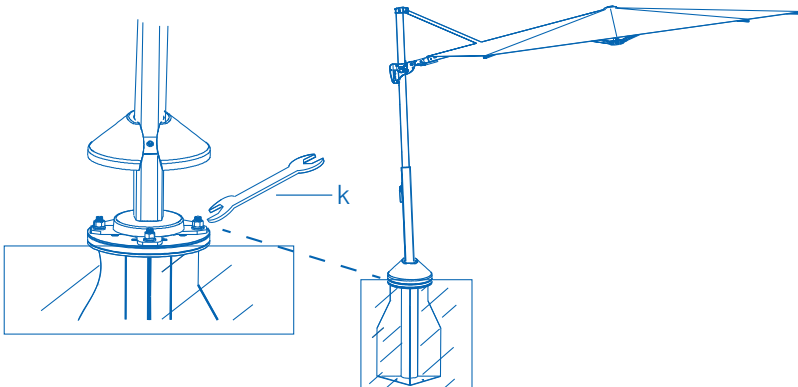

STEP 7

With the help of another person, align the mounting holes of your umbrella with the bolts on the mount, sliding them into position. Once you have the bolts poking through the umbrella's holes, place the appropriate flat washer (c or h), then split washer (d or i), then nut (e or j), onto each of the four bolt threads.

STEP 8

Use the appropriate side of the spanner (k) to fasten and secure each of the four nuts (e/j) onto the four bolt threads (b/g). If your umbrella has a mount cover, position it over the mount. You can now complete assembly of your umbrella (if required), and open up the canopy to begin using it. Periodically check that the nuts on the mount are still on securely and tighten if necessary.
