ASSEMBLY GUIDE

THANK YOU

FOR PURCHASING A COOLAROO PRODUCT

Exposure to ultraviolet (UV) radiation from the sun is the major cause of skin cancer. In some countries the UV radiation is strong enough to cause sunburn in just 11 minutes on a fine summer's day. To prevent sun damage, we recommend following the Sun Smart steps: slip on clothing, slop on sunscreen, slip on a hat, slide on sunglasses and seek shade.

To register your product, go to **coolaroo.com**. The product code can be found printed above the barcode on the product packaging, alternatively you can find it on the relevant **coolaroo.com** product page.

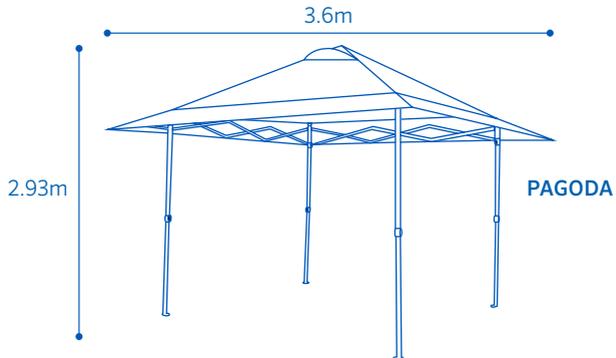

CARE & MAINTENANCE

When not in use for long periods of time, dismantle the gazebo and store in a dry place. If the canopy is wet, allow to dry naturally before storing.

If necessary, clean the fabric with a hose.

Components subject to turning and sliding can be treated with a non-staining lubricant spray (silicon-based).

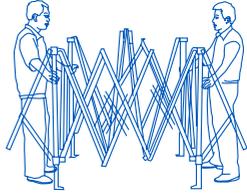

Attention: The illustrations in this manual are for assembly and operation purposes only. They may differ from the gazebo's actual appearance.

ASSEMBLY GUIDE

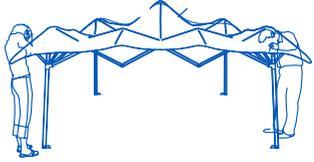

STEP 1

Working with a partner on the opposite side, stand frame upright and grasp the two outer legs. Slightly lift the frame off the ground and each take a step backwards.

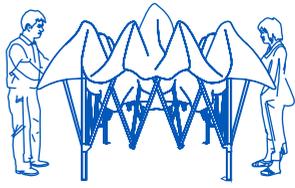

STEP 2

Place the main canopy on top of the frame and pull the canopy corner pockets over the awning tubes.

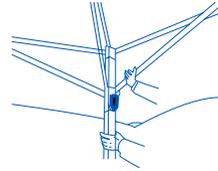

STEP 3

Each partner grasps the cross beams in the middle, lifts slightly and slowly walks backwards until fully extended. Take care not to use excessive force.

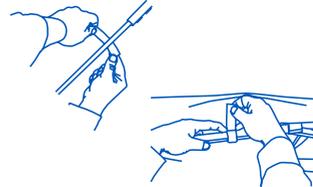

STEP 4

Engage the slider at each corner by pushing it up while holding down the top of the leg until it locks into place.

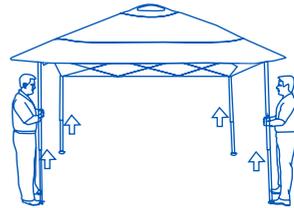

STEP 5

Secure the canopy fabric to the frame by wrapping the straps around the roof tubes and cross beams.

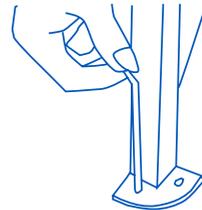

STEP 6

Lift two adjacent legs from the top outer section and pull down inner leg sections until they lock into position. Repeat on the other two legs, being careful not to twist the frame too much. This gazebo offers three height levels. To adjust, lift up the leg and push the button, then pull the inner leg until it locks into the next position. Raise all legs evenly.

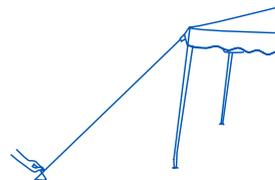

STEP 7

If using on dirt or grass, peg down the gazebo by pushing a small peg through the hole in the base of each foot.

STEP 8

Tie four guy ropes to the canopy corners. Measure out each rope to a suitable distance to the ground. Secure a stake at that location and tie the guy rope to the stake. Use the plastic adjusters on the ropes to ensure proper tension.

DISASSEMBLY

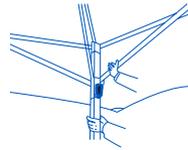

STEP 1

Release push button on each leg and shorten the frame to its original height. Undo the fabric straps from the roof tubes and cross beams.

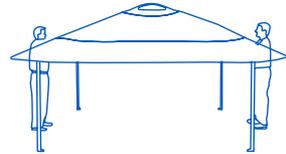

STEP 2

Release sliders on all four corners, depressing the push button and gently pushing each corner down.

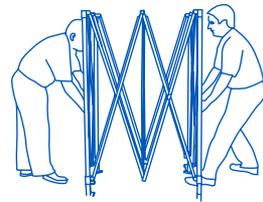

STEP 3

Remove canopy and pack away in storage pocket on the front of the bag, ensuring first that it's fully dry.

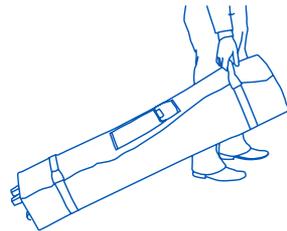

STEP 4

With a partner on the opposite side, grasp the middle section of the frame and lift slightly off the ground. Then slowly walk towards each other allowing the frame to fold inwards and come together, being careful not to catch your fingers in the frame.

STEP 5

Ensuring the gazebo is completely dry, pack the frame away in the storage bag and wheel it away to a suitable storage area.

WARNING:

- The gazebo must be secured to the ground with anchors and guy ropes.
 - Do not hang any object heavier than 2kg on the utility hook.
 - Keep canopy away from flames and other heat sources.
